Non-GAAP Financial Measure

In addition to reporting financial results in accordance with U.S. generally accepted accounting principles (GAAP), the Company uses a Non-GAAP measure of financial performance: *Adjusted Unrestricted Operating Cash Flow*, which is defined as GAAP net cash from operating activities, adjusted for changes in restricted cash. The Company's management believes it is important to consider Adjusted Unrestricted Operating Cash Flow, in addition to net cash from operating activities, as it provides more transparency into current business trends without regard to the timing of payments from restricted cash, which is primarily related to a dedicated account limited to the payment of certain internal royalty obligations.

This Non-GAAP financial measure is not intended to be considered in isolation from, as a substitute for, or superior to, GAAP results. This Non-GAAP financial measure may be different from similarly titled measures used by other companies. In the future, Take-Two may also consider whether other items should also be excluded in calculating this Non-GAAP financial measure used by the Company. Management believes that the presentation of this Non-GAAP financial measure provides investors with additional useful information to measure Take-Two's financial and operating performance. In particular, this measure facilitates comparison of our operating performance between periods and may help investors to understand better the operating results of Take-Two. Internally, management uses this Non-GAAP financial measure in assessing the Company's operating results and in planning and forecasting. A reconciliation of this Non-GAAP financial measure to the most comparable GAAP measure is contained in the financial tables to this press release.

Final Results

The financial results discussed herein are presented on a preliminary basis; final data will be included in Take-Two's Quarterly Report on Form 10–Q for the period ended December 31, 2019.
