NEW YORK, May 20, 2002 (BUSINESS WIRE) -- Rockstar Games, the world-renowned publishing division of Take-Two Interactive Software, Inc. (NASDAQ: TTWO), announced today that the PC version of Grand Theft Auto 3 is now available in stores.

Grand Theft Auto 3 received worldwide critical and financial success when it was released for the PlayStation(R)2 computer entertainment system last October and quickly became the undisputed number-one selling video game of 2001.

The early word from journalists has been nothing short of outstanding, focusing on the enhanced PC version's features, including improved graphics and sound, additional controls, as well as several brand-new options for players to customize the game.

"With this release, we've been able to take the time to maximize the gaming experience for the PC platform," said Sam Houser, the game's executive producer and president of Rockstar Games. "We are delighted to share the Grand Theft Auto 3 phenomenon with an entirely new audience, as well as the huge numbers of diehard fans who have patiently waited for GTA3 to come out on the PC."

"We were thrilled to add even more features to enhance the PC version of Grand Theft Auto 3," added Les Benzies, the game's producer. "The only way to follow up on the stupendous success of the PlayStation 2 version was to bring even more immersive functionality to an already amazing mind-blowing gaming experience."
